练习1

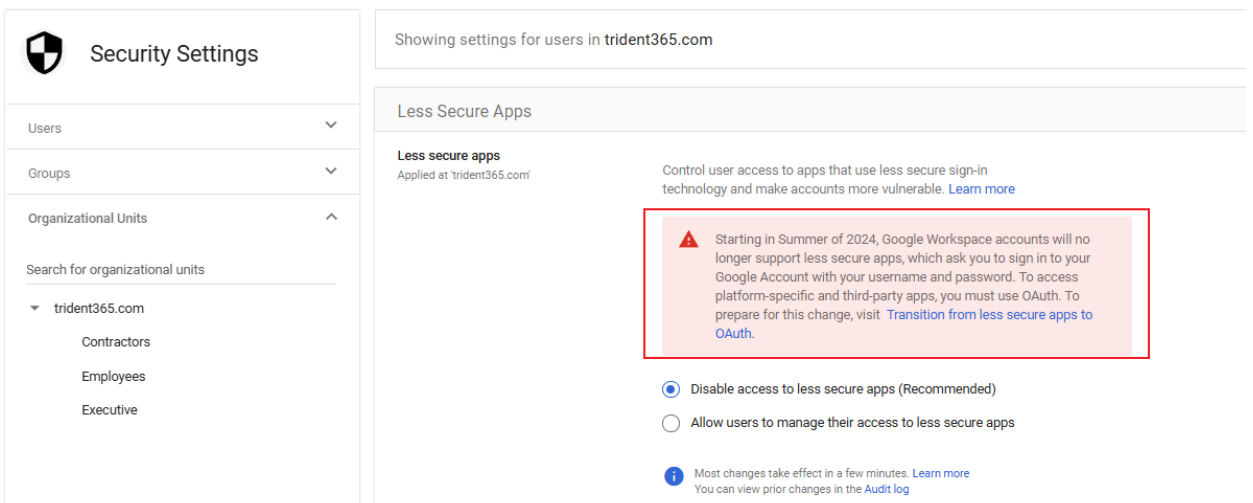

准备GWS域名，已经完成，略

配置通用安全设定

如果要变更PW方针，可以勾选下次登录时执行，这个方针适用单位是OU或以上。

避免您无法访问自己的账号

您所在的网域即将强制实行两步验证政策，以便提升账号安全性。

此政策将于 2025年2月13日起强制实行，届时系统将会在您登录账号时要求您输入动态密码。

为了避免您无法访问自己的账号，请立即注册两步验证。

[详细了解两步验证。](#)

以后再说

对于已经使用SSO登录的公司来说，不需要设置

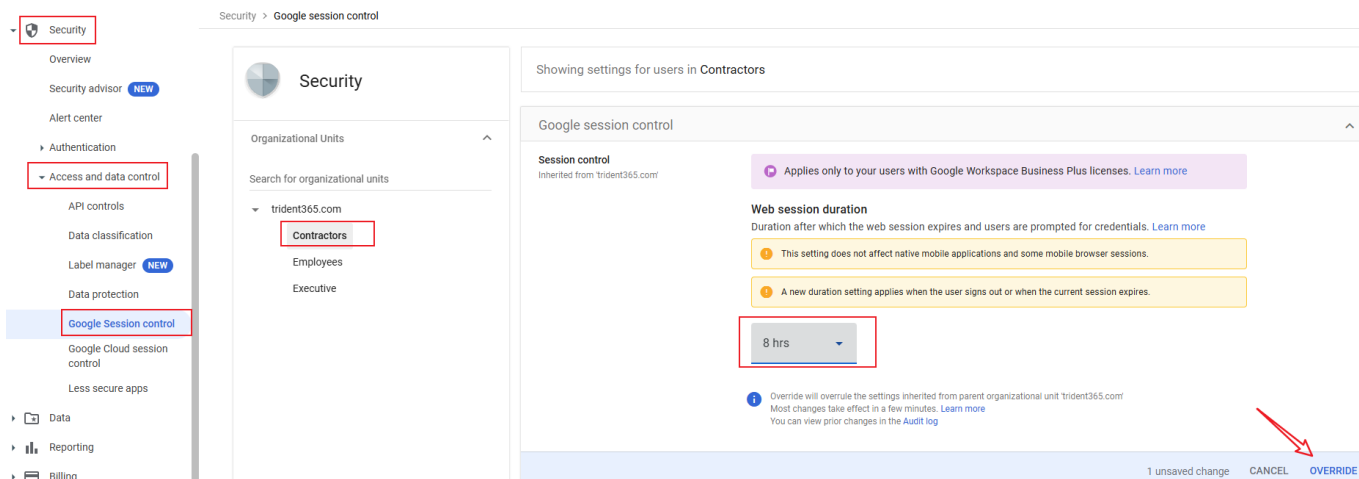

有4种方式

1. 通行密钥和安全密钥
2. Google提示（如手机端的Gmail）
3. 身份验证器（二维码或是OTP等）
4. 电话号码（验证码或语音电话）

参考链接<https://support.google.com/a/answer/9176657> 我们可以单独建立一个Group对OU关闭2FA但对Group是打开。

练习4

我们可以控制用户访问谷歌服务的会话时长，从1小时到默认的14天。

只对外包人员设置更短的会话时长。

测试1

The IT manager at your organization wants to know the advantages of using 2-step verification for your organization. What should you say? (Choose 2)

1. **It'll greatly reduce the risk of unauthorized access if a user's password is compromised**
2. We wouldn't have to manage individual user IDs and passwords for each user
3. It would be a great opportunity to make sure everyone in the organization has a security key
4. **It'll reinforce our domain's password security by requiring our users to enter an additional code or use a security key to sign in**

What are some best practices for reinforcing and monitoring the security of your domain?

1. **All the options**
2. Disable access to less secure apps
3. Set up 2-step verification
4. View and manage your users' security settings

Where do you go to manage your users' password strength?

1. **Security > Password management**
2. Reports > Security
3. Users > Account
4. Security > Password monitoring

The IT manager at your organization hasn't had a chance to explore the admin console yet but wants to know what individual security settings he can manage for a user. What are some examples you could give him? (Choose 3)

1. Review a user's administrative access
2. **Require a password change**
3. **Temporarily disable the user's login challenge for 10 minutes**
4. **Determine if the user is enrolled in 2-step verification**

Your organization has decided to enforce 2-step verification in 2 weeks. What actions should you keep

in mind when enforcing 2-step verification? (Choose 3)

1. **You'll want to provide a lead time for users to enroll before enforcement**
2. Enforcing 2-step verification will not affect your users as they can still opt-out.
3. **When you create new user accounts after enforcement, you will want to allow them a grace period before they need to enroll otherwise they will be locked out of their accounts**
4. **You'll want to confirm that all of your users are enrolled before enforcement**

Secure LDAP

同时管理SaaS和传统程序，需要LDAP服务，除了微软的AD外，还有谷歌的Secure LDAP

Use your Google directory as an LDAP server for authentication, authorization and directory

步骤

- Create LDAP client in the Admin console
- Configure your LDAP client to connect to the secure LDAP service

练习3

The screenshot shows the Google Admin console interface. On the left, the navigation menu has 'Apps' selected, with 'LDAP' highlighted under 'Additional Google services'. Below the menu, the text '设置最高权限' (Set maximum permissions) is visible. The main content area shows the 'Add LDAP client' screen. At the top, a message states 'Your organization doesn't have any LDAP clients' with a red arrow pointing to an 'ADD LDAP CLIENT' button. Below this, the 'Access permissions' section is shown with two red boxes highlighting the 'Verify user credentials' and 'Read user information' options. Both are set to 'Entire domain (trident365.com)'. Under 'Read user information', 'System Attributes' is checked, and 'Public Custom Attributes' and 'Private Custom Attributes' are unchecked.

✔ LDAPTest added

i Next, connect your client to the LDAP service

1. Download the generated certificate (it might take a few minutes to generate).

Want to do this later? You can generate and download a certificate at any time from the client's details page.
